

HOW TO MATCH YOUR PLATE CARRIER

STEP-BY-STEP PROCESS TO ENSURE YOU GET A “MISSION SPECIFIC” KIT

STEP ONE: IDENTIFY YOUR ARMOR

STEP TWO: IDENTIFY YOUR MISSION

- Modular “do everything”
 - Stripped-down, minimum attachments (back only)
 - Zero attachments, under/over garments
- = Level IV 6094 (Needed for CASS)
 - = 6094 SLICK
 - = 6094 Low-Vis

Plate Size: A - Medium (M) B - Large (L) C - Extra Large (XL)

MODULAR LEVEL IV PLATE CARRIER
LBT-6094-LEVEL IV (A, B, C)*

- Modular web attachment points on entire carrier profile provides maximum versatility
- Front, back, and side plate pockets
- Quick release tabs on bottom for front and back plate adjustment/removal
- Cummerbund for gear stowage and side body armor (6"x6" or 6"x8" hard plates and soft body armor – not included) with concealed rear bungee adjustment
- Dual interior side radio pouches with retention.
- Adjustable shoulder straps with removable wrap-around pads
- Cable, antenna and hydration hose guides
- Extra heavy duty reinforced drag handle
- Centered front Kangaroo pocket provides quick access to maps, critical gear and mags (will accept LBT-2645A)
- Interior loop attachment points for shoulder or collar soft armor
- Separate sleeves for soft armor package, hard armor package and CASS
- MIL-Spec stitching standards, Type E thread
- Weight: 3.1 lbs.

**** Armor plates not included****
LBT-6094A - Fits small and medium plates
LBT-6094B - Fits large plates
LBT-6094C - Fits extra large plates

*** Available in Standard and Swimmers Cut Plates**
**** Level III-A FRAG soft armor packages available**
Please contact your LBT sales representative for information

SLICK PLATE CARRIER
LBT-6094-SLICK (A, B, C)*

- Lightweight, stripped-down version of the LBT-6094A Plate Carrier with hook and loop closure
- Slick plate carrier with dual elastic sides
- Cordura® flap retention (500 Denier)
- Quick access 6"x3" front admin pocket with sewn-in bungee retention & external loop for ID tags
- Multipurpose sleeve for HALO board, chemlight, GPS or credentials
- Minimum amount of modular webbing on back to mount mission-essential gear
- Four routing points on front for PTTs, etc.
- Side pocket plates sold separately
- Weight: 1.5 lbs.

*** Available in Standard and Swimmers Cut Plates**
Side plate pockets available
Please contact your LBT sales representative for information

LOW-VIS PLATE CARRIER KIT
LBT-6094V (A, B, C)

Super Lightweight version of the LBT-6094A Plate Carrier. Available in Standard & Swimmers Cut Plates.

- Ultra slick plate carrier made of 500 Denier in Desert Sand
- Removable double elastic cummerbund with hook and loop closure
- Designed to be worn under clothes, but can also be worn over clothes
- Comes with removable 6"x6" side plate pockets
- Slick front has 4"x4" loop for identification tags
- Two routing points on front for PTTs, etc.
- Super-light, quick-dry mesh against body
- Shoulder straps can be cut to fit
- Radio pouch included
- Weight: 12 ounces

HYBRID FRONT PLATE VEST PANEL
LBT-6094K (A, B, C)

Designed for use with our Modular Level IV Plate Carrier. Available in Standard & Swimmers Cut Plates.

- Interchangeable front plate sleeve adapts to specific mission set
- Three sewn-on M4 pouches with Cordura® flap and elastic retention, two magazines per pouch
- Elastic pull tabs for quick magazine access
- Quick access 6"x3" front admin pocket, with sewn-in bungee retention and external loop for ID tags
- Multipurpose sleeve for HALO board, chemlight, GPS or credentials
- Six routing points on front for PTTs, etc.
- Weight: 1.2 lbs.

**** Armor plates not included****
LBT-6094K fits LBT-6094 Level IV (A, B, C) plate carriers.
LBT-6094K-M (Medium), LBT-6094K-L (Large), LBT-6094K-XL (X-Large)

AA SHIELD BULLETPROOF SOFT PANEL INSERT NIJ III-A

Unfortunately, today's society faces the rising threat of violence that has increased the demand for high quality ballistic protection. Fortunately, AA Shield has made it their mission to bring high quality ballistic protection to consumers at affordable prices that is lightweight and comfortable and their Bulletproof Soft Panel Inserts are a prime example of their commitment.

This hybrid solution of bullet and stab protection is constructed from an Aramid Core and the Bulletproof Soft Panel Insert boast a NIJ rating of III-A. Being one of the highest rated soft core panels available means that it not only offers comfort while being worn, it also offers great protection while reducing fatigue with extended wear. They also offer enhanced protection when used in conjunction with other ballistic protection products.

Aramid fibers, an essential component to modern protective vest, is a unique unidirectional (UD) laminate that is available for soft body armor panels and components. Making full use of inherent high fiber tenacity, the Aramid UD is constructed in a configuration that helps to avoid material crimping. Using advanced UD technology, the Aramid fibers are layered in a parallel manner with each layer constructed individually within a resin matrix and thermoplastic film

that is laminated from top to bottom to ensure ideal abrasion resistance. Additionally, our soft panels can be custom shaped to fit your specific needs.

Key benefits of AA Shields soft panel inserts include:

- Rated protection against 9mm, .357 FMJ, .44 MAG caliber rounds.
- Added protection from stabbings.
- 5-Year manufacturer's warranty.
- Tested by H.P. White Laboratory, Inc. in Maryland.
- Resistant to UV, water, corrosion, and gouging.
- Triple tested to ensure quality.
- Provides optimal performance to weight ratios.

AA SHIELD NIJ III+ HARD PLATE

While AA Shields' NIJ III hard ballistic plates offer substantial protection, it does have its limits. When the threat of larger caliber rounds is a factor, you will need some ballistic protection that offers a little more muscle and that's where AA Shields' Hard Plate NIJ III+ excels.

The unique design of this hard plate armor allows it to remain extremely effective at providing ballistic protection from large caliber rounds while remaining lightweight. While it may not provide as much protection as our NIJ IV Hard Plates, it can withstand multiple impacts from an AK assault rifle.

Constructed of UHMWP, Ultra High Molecular Weight Polyethylene, this model uses multi-layered sheets that provide enhanced ballistic protection that is comparable to, if not greater than, metal plates. Unlike metal plate protection, which provides less trauma reduction and could result in fractures, UHWPE plates are referred to as being ten times stronger than steel and can be strewn into a thread and then woven into a fabric. This low weight, high tenacity material provides optimal energy absorption and lightning fast shockwave dissipation.

AA Shields has developed a bulletproof vest made of this amazing UHMWP material that is soft, comfortable to wear for extended periods, and lightweight. This unique and innovative material offers optimal ballistic protection as well as ideal energy absorption.

Some of the key benefits of using AA Shields Hard Plate NIJ III+ include:

- Multi-impact capacity.
- Rated protection from AK AP, SS 109, and M 80.
- Resistant to water, UV, acids, oils, and temperature shifts.
- Can be cut to your specific needs.
- Can be used with various carrier systems.
